DETAILED ACTION

Allowable Subject Matter

1. In view of the amendment of claim 7 the indicated allowability is withdrawn.
2. Claim 25 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or fairly suggest searching a search condition includes a condition that the search point lowers more as the number of assignment times of the code by said assigning means for the plurality of processes is larger, as recited in claim 25.

Response to Arguments

3. Applicant's arguments with respect to the amended and new claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muguet (US Pat No 4,787,063).

Art Unit: 2623

In regard to claim 7, Muguet discloses the use of codes with program record reservations so as to help the user with the scheduling of a recording system (Col 4, Lines 11-44; Col 5, Lines 16-34). The claimed limitations of “processing means for executing a plurality of processes” and “control means for controlling said processing means...” is met by Figure 1, where “Computer Server Center” is the control means and the terminal is the processing means. The claimed limitation of “assigning means for automatically assigning ...” is met by the systems shown in Figure 1. The unique code corresponding to the process to be executed to the program can be met by the aforementioned listening/viewing reservation. The user uses the provided menu to make the reservation. The claimed limitation of “input means for inputting program data and program information of the program data” is met by Figure 1 (See Col 4, Lines 44-51). Muguet fails to disclose, “searching means that adds a search point if a program matches a search condition and selects a program having a high search point”. The Examiner takes Official Notice that it is notoriously well known in the art to “searching means that adds a search point if a program matches a search condition and selects a program having a high search point” so as to increase the chances of a user successfully locating a desirable program in a short amount of time. Consequently, it would have been obvious to one of ordinary skill in the art to modify Muguet with “searching means that adds a search point if a program matches a search condition and selects a program having a high search point” for the stated advantage.

Claim 26 is met by that discussed for claim 7.

Art Unit: 2623

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
